Jaks

Having previously purchased a frozen yogurt machine from Taylor UK, I knew that I could trust their advise, particularly as I was looking to improve the productivity of our kitchen, and as expected I was not disappointed with Taylor's solution and the TurboChef oven supplied

The introduction of the oven has allowed us to greatly improve our menu range, in addition to improving our productivity and food quality. In fact I am so impressed by the oven I have recently purchased another one for

my new restaurant

Name:	Jaks
