

# CTP80 BLD INT FlavorBlend™

## Soft serve flavouring system

The FlavorBlend CTP80BLD INT system is a revolutionary add-on that allows you to dispense nine flavours from your soft ice cream machine. The system works by blending concentrated flavouring syrups into the soft ice cream as it is dispensed creating a unique, highly desirable product.

### Single head system

Attaches to many popular soft serve freezers and accommodates a wide variety of soft serve products.

### 8 flavour cabinet

The CTP80BLD conveniently fits into a standard C201 cart and maintains up to eight flavours within the system, flavours can be combined giving limitless combinations. Simply select as few or as many flavours as you like and the system will automatically layer the flavours as product is drawn.

### Custom touch panel

The full colour, high resolution touch screen controls all of the functions of the unit. Videos, pictures, logos and graphics can be uploaded for total customisation.

### Gear driven injection

The injection assembly is gear driven improving reliability and maximises power transfer to the blending head.

### Custom microprocessor

The unit has extensive functionality including flavour calibration for both flow and taste, or the ability to combine different flavours together within the system.

### Twist-on bag connectors

The bag-in-a-box system is easy to use and quick to change.

### Peristaltic syrup pumps

Each flavour has its own dedicated peristaltic pump providing reliable operation.

### Clean-in-place

The CTP80BLD INT's easy to wipe stainless steel and plastic with built in rinse functions make the unit quick and simple to clean.

### Remote sanitiser tank

The CTP80BLD INT has an internal sanitiser tank for flushing the system and rinsing the blending head.
