\*Minimum air clearances **MUST** be met to assure adequate airflow for optimum performance of air cooled machines. Place the back of the unit against a wall to prevent recirculation of warm air. No air gap is required on right of machine when discharge chute is fitted.

\*\*Hourly production figures are approximate and based on optimum operating conditions. Product type, ambient air temperature and air flow will effect the production capacity.

•A dedicated power supply is required for safe operation. Taylor equipment should never be operated on any form of extension lead, please consult a qualified electrician for correct installation advice.
