LA CIMBALI ELECTIVE

LA CIMBALI ELECTIVE AUTOTAMPER

ITEM No. _____

Model options:

- LA CIMBALI ELECTIVE
- LA CIMBALI ELECTIVE AUTOTAMPER

Standard equipment:

1.5Kg hopper

Optional extras:

- Standard tamper
- Standard knock out draw

Features:

Impeccable quality in the cup! To guarantee the finest quality in the cup and maximum flexibility, we created Elective so that it could interface with the most advanced La Cimbali machines.

- **Easy-to-use and better performance** - A compact design featuring elegant shaping comes together with a new Inverter motor to bring about definitive change in the way we view grinding as a concept. The contained dimensions of Elective are designed to ensure optimal use in small spaces and improve the aesthetics of the bar or counter. The hopper is perfectly balanced and can be located safely on any worktop. This small detail in fact makes all the difference, making it easier to refill Elective and simpler to clean and control.
- **Customisable touch screen** - The 4.3" touch-screen display is easy to use and completely customisable. This starts with the look, the appearance, which is left to the discretion of the barista. But there's more: in just a few steps, you can adjust the Elective grinding settings to ensure you get the result you want, every single time. The barista is also responsible for selecting and configuring programmes, while a set of pre programmed settings is also provided.
- **The perfect coffee** - The motor of the grinder, for example, is equipped with a low-energy consumption inverter, which ensures consistent standards over time, even during intense levels of use in peak times. On top of that, the ventilation system used by Elective is able to keep the temperature of the grinder, beans and ground coffee constant, thus ensuring that the resultant coffee is both unaltered and un-compromised.
- **Elective Autotamper** - Autotamper is the tool that guarantees tamping precision every time. User friendly and intuitive, with the Autotamper you can grind and tamp coffee with the same product for the best quality result. Time saving, space optimization, consistency and ergonomic are the key words of the AT Technology.
- **Perfect Grind System (PGS)** - Thanks to the bluetooth system integrated in the grinder, La Cimbali M26 TE traditional espresso equipment (Bluetooth & Wi-Fi enabled) can communicate with Elective to consistently guarantee perfect coffee grinding, partly thanks to PGS technology.
