VITRO UNDER-COUNTER (4x 4 pint)

(Milk fridge requires separate power supply)

Standard equipment:

PSSR safety certificate

Starter pack cleaning chemicals

Optional extras:

Water filter kit

Features:

La Cimbali knows just how important every drink is for you and your customers. That is why the S20 is designed to guarantee a wide and varied range to satisfy every palate, always with maximum quality guaranteed.

- **7-inch touch-screen** display allows you to see different options on the drinks menu (pre-selection and Group Mode) and to customise images displayed by the machine (such as screen savers and during beverage dispensing). You can also assist the customer when choosing their drink with video clips and animations. It is all very simple and intuitive.
- **TS4 TurboSteam Cold Touch** (Semi-Automatic ONLY) the outer surface of the wand is cold before, during and after it emits steam. The wand is coated with a special insulating, non-stick material. This makes the TS4 wand easy to clean and prevents milk residue from sticking to it.
- **AWS automatic washing system.** The daily washing cycles are automatically managed by the AWS system. This innovative system provides thorough, efficient cleaning, ensuring maximum hygiene with just one touch.
- **Hoppers and solubles** - Dual 1.5 kg bean hopper and built-in soluble chocolate system. The S20 guarantees optimal soluble delivery, offering just the "heart" of chocolate. (Chocolate only available on CS models)
- **Integrated bi-directional Wi-Fi system** - You can remotely communicate with the S20 via the integrated bidirectional Wi-Fi system, which makes updating software, setting recipes and customising background images simple and intuitive. (requires Wi-Fi connection at point of installation)
- **Titanium coated grinders** - S20 is equipped with grinders designed to get the most from coffee beans. The Titanium grinders, which are made of K110 steel with a PVD coating, are very robust and designed to last for a long time.

| Connectivity                        | Bi-directional Wi-Fi + USB   |                |                                |              |
| Water / waste connection*           | 2 Bar potable water (3/4" BSP shut off) / downpipe with U-bend (1-3/4")                |                |                                |              |
| Voltage                             | 230v / 50Hz / 1Ph  |                |                                |              |
| Installed power                     | 3,000 W  |                |                                |              |
| Circuit breaker/fuse                | 13 amp   |                |                                |              |
| Power socket                        | 13 amp (1P+N+E)  |                |                                |              |

The external milk fridge requires it's own independent power supply (13amp plug socket - 5amp)

PLEASE NOTE: All counter cut-outs and utilities must be made and installed by the customer prior to delivery and installation.

\*ALL La Cimbali coffee machines require a 2 Bar potable water supply (fitted with a suitable water filtration device) terminating in a 3/4" BSP shut-off valve and 1-3/4" waste downpipe with U-bend. Water and waste utilities must be located directly beneath the final position of the coffee machine.

Failure to have suitable utilities and counter cut-outs in place at point of installation may result in an aborted installation and will be chargeable.
