# THE SERVE

## PULL IT YOUR WAY

### SOFT SERVE, SHAKES & FROZEN DRINKS

The SERVE by Taylor UK brings you a range of Taylor & Icetetro soft serve and frozen beverage equipment allowing you to start serving amazing creations on demand with just the pull of a lever!

#### *Pull It Your Way...*

- **Chose your product** - soft ice cream, frozen yogurt, sorbet, vegan 'ice cream' milkshakes, frozen cocktails/mocktails, froze wine, iced smoothies, iced coffee, or whatever product you like!
- **Chose your equipment** - high or low volume, pump or gravity fed, 3 or 14 day cleaning cycle. We'll make sure you've got the right machine for your business.
- **Chose your branding** - machines are available with the optional THE SERVE wrap, alternatively we can brand the equipment with your own design and colours. Or you can have them in classic stainless steel.

#### *Why you should sell soft serve, shakes or frozen drinks...*

- **High Profit Margins** - Soft serve and frozen drinks typically have low production costs compared to its selling price, resulting in high profit margins.
- **Quick Turnaround** - Soft serve and frozen drinks machines can produce product rapidly, and store it so it's ready on demand allowing for efficient service during busy periods and reducing customer wait times.

- 230v/50hz/1ph - 13amp

The perfect  
**PROFIT  
GENERATING**  
addition to any  
Food Service Business

# TAYLOR SOFT SERVE EQUIPMENT

One of the world's longest established and best known manufacturers of soft serve machines, earning a reputation for being at the forefront of technological developments in the food service industry.

## Benefits of selling soft serve

- **A genuine impulse purchase** - customers cannot recreate soft serve at home
- **Profitable** - generate profit margins in excess of 80%!
- **Flexibility** - soft serve ice cream can be the base for cones, tubs, sundaes, shakes, soda floats, or add Flavor Burst for something really special (see page 8).
- **Fast return on investment** - get a return on your investment in a matter of months not years

## Soft serve mix options

**UHT mixes** – Ultra Heat Treated mix is supplied in one or five litre tetra packs, can be stored in ambient conditions and has a shelf life of up to 12 months.

**Powdered mix** – This mix is the dried version of UHT mix that you rehydrate yourself by mixing it with milk or water, it can be stored in ambient conditions and has a shelf life of up to 24 months.

**'Fresh' mixes** – Fresh mix is supplied in one litre or gallon containers and is stored in a frozen form, to use simply thaw in your refrigerator and pour it in your new Taylor machine. It typically has a shelf life of 12 months (frozen).

**Make your own** - There's nothing to stop you making your own bespoke soft serve recipe using one of our Frigomat pasteurisers, contact us for more information.

## Soft serve machine options

### Single or twin?

If you want to serve more than one flavour or product at a time the twin machine is for you, whether offering vanilla and strawberry ice cream or ice cream and frozen yogurt from your machine this option allows you to 'twist' the two products together from the middle spout.

### Gravity or pump?

A gravity machine is simpler to use and will produce a thicker creamier finished ice cream whereas a pump fed machine will give you more air in your finished product and will dispense much quicker.

### 3, 14 or 28 day clean?

A standard ice cream machine needs cleaning every 3 days alternatively you could choose the heat treat version of our freezers which only require stripping and cleaning every 14 or 28 days.

### Counter top or floor stood units?

We have a machine for every location so whether you want it positioned on your back counter or stood in its own area there's a machine to fit your business.

Visit [www.taylor-company.co.uk](http://www.taylor-company.co.uk) for more information, download specification sheets, try out our profit calculator or request a **FREE consultation with your local Taylor UK sales manager**

## Profit example: 3.5oz Soft Ice Cream Cone

Single or three phase

\*Number of cones per hour is approximate

# TAYLOR FROZEN DRINKS EQUIPMENT

One of the world's longest established and best known manufacturers of soft serve machines, earning a reputation for being at the forefront of technological developments in the food service industry.

## Benefits of selling milkshakes

- **Highly profitable** – margins in excess of 75% and no VAT on take away products
- **Speed of service** – with genuine thick shake available on tap and options for integrated syrup injection systems you can avoid bottle necks in service
- **Stay ahead of the competition** – 'American style' thick shakes allow you to offer your customers a great product they can only get from you
- **Choice of flavours** – whether blending or using a Flavor Burst system you can offer a wide range of flavours, even changing them with the seasons

## Shake machine options

**Single flavour** - Create the perfect base blend of shake from a standard machine, just decide on how much you need to have on tap.

**Add a spinner** - Fit a Taylor shake blender to the side of your machine so that your team can blend through flavours and offer your customers real choice.

**Add a Flavor Burst** - This exclusive syrup injection system allows you to produce vanilla plus eight additional flavours at the press of a button (see page 8).

**Do you want to go large?** The PH61 machine is the choice for major high street retailers with integrated syrups, heat treat function, a pump to increase yield and speed of service and the Magic Eye portion control system.

## Benefits of frozen drinks

- **On demand** – have your product available on tap during busy service periods... no more labour intensive preparation!
- **Consistent** – uphold your brand standards regardless of which operator serves the drink
- **Unique selling point** – create eye catching, visually impressive drinks to tempt your customers
- **Increased spend** – serve low cost, high perceived value drinks to your customers and attract those high spenders!

## Frozen drink options

**Slushes** - That classic kid's favourite iced drink, the brighter the colour the better!

**Cocktails** - From margaritas to daiquiris you can serve slushie cocktails on tap day and night.

**Mocktails** - Let the little ones (or your designated driver) join in the fun with non-alcoholic cocktails.

**Smoothies** - Produce healthy, nutritious smoothies for your more health conscious clientele.

**Iced teas and coffees** - From frappes to iced teas, capitalise on the success of the UK's ever expanding coffee culture.

Pump fed  
1535 (h) x 641 (w) x 987 (d) mm  
Three phase only

\*Number of cones per hour is approximate

# FLAVOR BURST SYSTEMS

Greater profits from greater choice...

The exclusive Flavor Burst range is an add on that can attach to a Taylor machine and allows the user to automatically add flavours to whatever product you're serving, whether stripes on your ice cream, flavours to your shakes or fully blending through your ice cream you can add one at a time or mix it up in each portion.

## Benefits of adding Flavor Burst™

- **Unique selling point** – stand out from the crowd by adding a Flavor Burst unit to your Taylor machine
- **Increase spend** – increase your RRP by offering your customers amazing choice
- **Speed of service** – offer eight additional flavours from your machine... at the press of a button!
- **Keep 'em coming** – once the nippers have tried one flavour they'll be back to try the other seven, trust us!

# ICE CREAM & GELATO PRODUCTION

Based in the center of the Italian manufacturing heartland near Milan, Frigomat have designed and manufactured artisan ice cream pasteurisers, batch freezers, combination machines and aging vats for over forty five years.

The range encompasses everything you need to manufacture ice creams, gelatos and sorbets from scratch. If you are unsure of your requirements, take part in a free demonstration or introductory course with one of our ingredients partners.

Introductory courses are held throughout the UK at Taylor UK's own demonstration facilities and in partnership with some of the UK's leading ingredients suppliers.

## Don't buy Gelato, make your own!

Gelato, ice cream, sorbet, frozen yogurt, fruit ice granita, vegan desserts and much more.

*Imagination is your only limitation!*

It's as simple as 1... 2... 3...

**Step 1: Make your base mix:** Pour the milk and cream into a Frigomat pasteuriser and heat it to 40°C, combine the sugar and stabilisers together in a dry container, slowly add this to the warm milk when it has reached 40°C. Allow the pasteuriser to complete its pasteurisation cycle – heating to 85°C and then cooling the mix back to 4°C. The whole process takes around 2 hours and is a completely automated system.

**Step 2. Freeze your flavours:** Pour the flavoured mix into a sanitised Frigomat batch freezer. Select the automatic freezing function and watch your base mix become frozen ice cream right in front of your eyes. The freezing process takes around eight minutes. When the buzzer sounds, extract the frozen product into a napoli container and pop it in the freezer to set hard.

**Step 3. Serve:** Serve your home made ice cream in any way you choose!

## Counter top batch freezers

Make up to 2.5kg of fresh ice cream per batch. The timer controls the continual or cyclic freezing process with preservation function at the end of the cycle.

## Pasteurisers

Available in 30, 60 or 130 litre configurations, these automatic pasteurisers heat, hold and chill your mixes ensuring quality, consistent, safe results every time.

## Automatic horizontal batch freezers

Freeze anything between 2 and 15 kg of ice cream per batch, quickly, consistently and automatically using the Frigomat electronic freezing control system. The NEW Twist batch freezers now feature self-cleaning functions to speed up productivity.

## Vertical batch freezers

Create traditional artisan ice creams and gelato in batches of 4 to 11kg per cycle. The timer controlled freezing process is perfect for 'hands on' operators.

## Combination heater/batch freezers

Go from raw ingredients to finished gelato in as little as twenty minutes! A truly artisan machine perfect for seasoned professionals and amateurs alike.

## GX batch freezer/displays

Available in 2, 4 and 8 flavour configurations; freeze, display and serve perfectly frozen ice cream and gelato straight from the machine.

Taylor UK Gelato Academy  
*Start your gelato Journey...*

We have gelato demonstration locations across the country - London, Ipswich, Bodmin, Manchester & Glasgow.

At each of the demonstration centres you will be able to see examples of our Frigomat pasteurisers and batch freezers in operation. This will allow you to get involved with the equipment and see how it will work for you and your business.

# REFRIGERATED DISPLAY CABINETS

When Francesco Rossi founded ISA in 1963, he could never have imagined that it would become one of the world's leaders in the manufacture of professional refrigerated displays and storage solutions. From the beginning, the company has been synonymous with quality, unique design, aesthetics, ecological awareness, energy saving technology and innovation, all of which have gained it many 'firsts' in its sectors, namely:

- The first refrigeration company to bring cutting edge design to the world of gelato displays
- The first to design an angled display case that maintained quality of workmanship and materials
- The first to build a fully automatic showcase with a unique 360° transparent display
- The first refrigeration company to gain the ISO14001 standard for environmental management

The factory, based in Bastia Umbra, Italy is made up of five production plants covering a total of 122,000 square metres; 5,000 of these are given over to research and development. Here 43 technicians are constantly involved in enhancing the existing range and creating new technology and cabinetry for future needs. Four climate chambers allow all 'project designs' to be fully tested before going into production.

With this level of commitment and investment it's no wonder that over 10,000 pieces of equipment are manufactured for use in Italy, as well as in 83 different countries every year.

## Cabinet options

### Promotional ice cream displays

Catch the eye of passing trade with ISA's range of plug in ice cream displays.

### Professional gelato cabinets

Display and serve your own homemade gelato in the best way possible.

### Chilled pastry displays

Available chilled, ambient or for chocolates - really show off your products.

### Self or assisted service refrigeration

Grab 'n' go refrigeration perfect for displaying drinks, sandwiches and much more.

### Multi-deck refrigerated units

Showcase pre-packaged items in the most attractive way possible.

### Deli serve overs

Refrigerated serving displays ideal for cheese, deli items and butchers.

### Retail 'impulse' cabinets

Island displays, perfect for capturing extra sales on the way to the check out.

ISA's extensive range of refrigerated, frozen and ambient display cabinets makes them the ideal refrigeration partner for all businesses in the food service and retail sectors.

The extensive range of 'Plug-in' cabinets provides a simple out of the box solution for most applications, but custom built options are possible and can be designed by the ISA Projects Team.

## PROMOTIONAL ICE CREAM CABINETS

**IL CARRETINO**  
6 Napoli or Pozzetti Pans

**FIJI**  
4, 6, or 7 Napoli Pans

**BERMUDA**

# CUSTOM PROJECTS & SHOP FITTING

ISA Projects is the 'bespoke' division of HTG Trading. Our experienced project managers can help you turn your initial ideas into a reality. The ISA Projects team draws on years of experience designing and building custom shop fittings allowing you to customise every aspect as you see fit.

ISA Projects can source equipment from all of the HTG Trading sales divisions, ensuring you have the best equipment possible from Frigomat batch freezers and ISA refrigerated counters through to Scotsman ice machines and Friulinox blast freezers. Our teams can also help you source equipment from other external suppliers.

## ISA Projects aims to provide a 'one stop shop'.

A single source, bespoke, turnkey solution, working with industry leading fabricators, project management teams and shop fitting experts to deliver 'best in class' shop design, build, and concept launches for all sectors of the hospitality and foodservice business.

## A complete service

- **Free initial consultation** - our ISA Projects Manager will meet you at your premises and talk you through all of the options available to you.
- **Free initial design drawings** - we provide basic line drawings of the different options available.
- **Basic 3D renders** - of what your new ISA counters and displays will look like, to help you visualise your new shop options before you decide on a final design.
- **Free training** - demonstrations, training and product advice on all aspects of our equipment. Allowing you to decide exactly what is best for your operation, ensuring you get the most out of your investment.
- **Architect's drawing** - once a initial contract is signed, we can provide full and complete plans for your new store, or if you prefer we can work alongside your nominated contractors to provide a project management solution.
- **Parts & labour warranties** - equipment supplied by ISA Projects are covered by HTG Service 364 days a year.

## A complete solution

- **Back of house** - design & build kitchen, storage and preparation areas for food, beverage and service, including clean down and wash up areas.
- **Front of house** - design and build front of house display and serving areas including counters, rear upper structures, and preparation areas.
- **Customer Experience** - everything from the front door to the bathrooms! We'll help you with everything from design and colour options for the counters to seating, tables, chairs, lighting to create the right ambiance.
- **Culinary Support** - from product partner introductions and first stage management, menu delivery through ISA Projects sourced products to brand standard processes and getting the vision on the plate.
- **Project Management** - on site management of the project from concept to opening.
- **After Sales Support** - warranty provision and ongoing service support facilitated by HTG Service for the life of all equipment supplied in each project.
- **Customisable** - our service is flexible, we can provide different levels of support from simply supplying bespoke cabinets for you to install yourself, through to complete 'turn-key' project management. We can work with you to get the most out of your budget.

Visit [www.taylor-company.co.uk](http://www.taylor-company.co.uk) for more information and request a FREE consultation with your local ISA Projects manager

# ISA Project options

ISA Projects likes to listen to our customers and turn their own ideas into a reality. One of our design experts will visit you at your premises to discuss your requirements and ideas, offering suggestions and practical advice on the best way to bring your imagination into the reality. Our experts will share their experience with you to ensure that you get the best possible shop fitting solution which fits within your premises, design ideas, finish expectations and ultimately ensuring that you have something which makes the most of your budget!

## Customised options

- **Initial consultation** - meet with one of our design experts to evaluate what options are available and more importantly to offer an experienced view of what is required to make your vision come to life.
- **Fully measured drawings** - are undertaken and any obstacles are discussed early in the process to avoid any potentially costly changes at the end. Your ISA Projects expert will walk you through your final executive drawings ensuring you're happy and that everything will fit as discussed when it's delivered.
- **Visual renders** - ISA Projects can supply an artist's impression of what your new customised counters will look like.
- **Complete design** - incorporate front and rear counters to ensure you have sufficient working space, include (if required) bespoke rear upper structures for shelving, brand design and practical display solutions.
- **Account management** - your personal ISA Projects manager will manage the design, ordering, delivery and, if necessary, installation of your custom project providing you with regular updates at every stage.
- **Installation** - your ISA Projects Manager will be on site to ensure a safe delivery of your custom equipment. If you wish, we can install your counters for you and if necessary can arrange qualified tradesmen to undertake any plumbing or electrical work that is required for the correct installation of the equipment.
- **Aftercare** - warranty and maintenance packages are available from HTG Service customer service and support centre.

## Standard options

- **Off-the-shelf** - we offer a range of modular set sized units to fit most applications.
- **Flexible refrigeration** - available ventilated or static, refrigerated or frozen, there's a unit to suit all product types.
- **Customisable** - ISA can match almost any RAL colour.
- **Decorative finishes** - high gloss lacquer, back painted glass, Corian, granite, stainless steel and many more...
- **Basic layout drawing** - a line drawing will be provided to ensure all of your equipment fits.
- **Delivery options** - we can manage your order from design through to delivery and have them professionally fitted by our own experts. Alternatively we can just supply the units and you can fit them yourself.

**We can supply a wide range of standard modular units offering ambient, ventilated or static displays that can be ordered as supply only, this is suitable for those experienced operators who already have their own consultant, designer and fitting team.**

# COFFEE EQUIPMENT

## Perfection in every cup!

Taylor UK brings you Barista Tech, your complete coffee equipment solution.

Our mission is to solve your coffee problems. We work with some of the biggest names in the coffee equipment world so whether you need a traditional espresso machine, or a precision bean to cup machine.

Our goal is to find you the perfect equipment for your business and budget.

- **Traditional Espresso** - 1,2,3 or 4 head machines, compact or tall cup, standard or programmable steam wands, Bluetooth connectivity, push button or touchscreen and more....
- **Bean-To-Cup** - how many cups do you want to serve? Do you want automatic milk steaming or manual? Where would you like and how big do you need the milk fridge to be? Does it need to make hot chocolate as well? What would you like your coffee machine to do?
- **Grinders** - good coffee is all about the grind... manually adjusted, auto adjust, auto tamp, on demand, bulk grinding.... You name it, we can get it!
- **Bulk Brewing** - do you need great coffee in large volumes? Our bulk brewing solutions are ideal for conference centers, hotels, institutions, or even coffee shops who want to offer a perfect cup of freshly brewed filter coffee.

- **Cold Brew** - however you 'cold brew' you'll need ice. We can find you the perfect Scotsman ice machine solution for your cold drinks.
- **Cold Brew** - HTG Service can provide service and support for your coffee equipment, including annual PSSR (pressure vessel) tests to ensure you for fill your insurance obligations.

*How do you like your coffee?*

# PRÁTICA RAPID COOK OVENS

## Ventless cooking technology

**Prática**

Prática Produtos SA, founded in 1991, is the leading manufacturer of commercial food and bakery products in South America. Prática has been engineering and manufacturing high-speed ovens since 2007.

The company has over 500 employees, 40 of them in Research & Development, and a 250.000 square foot state-of-the-art engineering and manufacturing facility.

### How rapid cook ovens work

Precisely co-ordinated impinged hot air and radiant heat browns the outside of the food while evenly distributed microwave energy cooks the inside, resulting in rapidly cooked, high quality food. The integral catalytic converter system on most models allows for ventless\* operation by scrubbing the grease, odours and particles from the cooking chamber. This allows rapid cook ovens to be sited almost anywhere giving operators the greatest flexibility possible in the smallest space.

#### Typical cooking times:

- Toasted Panini sandwich - 60 seconds
- Fresh dough pizza - 2 minutes 30 secs
- Spicy potato wedges - 2 minutes
- Roast vegetables - 3 minutes
- Salmon en croute - 2 minutes 30 secs
- Full English breakfast - 2 minutes 20 secs
- Buffalo chicken wings - 3 minutes
- Nachos - 45 seconds

#### Profit example: Ham & Cheese Toastie

Selling price:	£2.95
Less VAT (20%):	£0.49
Sub total:	£2.46
Less product costs:	£1.00
Profit per portion:	£1.46
Average daily servings:	40
Nett daily profit:	£58.40
Selling days per year:	360
<b>Nett annual profit:</b>	<b>£21,024.00**</b>

### Features of rapid cooking include

- **Speed** - rapid cooking up to twelve times faster than conventional methods without compromising on quality and finish.
- **Reduced wastage** - increased cooking speed allows more items to be cooked to order, reducing the need to hot hold items.
- **Energy efficient** - Rapid Cook Ovens use less energy when idle, costing less to operate than conventional cooking equipment.
- **Consistent and easy-to-use** - once programmed, the oven cooks consistently regardless of the operator.
- **Touchscreen Controls** - all Prática ovens feature a high resolution touchscreen interface which features text, icon or picture options for easy, intuitive use.
- **I.O.K Internet of Kitchen** - the latest generation Prática rapid cook ovens have Wi-Fi connectivity allowing them to connect to Prática's IOK system. Menu settings and software updated can be downloaded directly to the oven.
- **Customisable** - Prática Copa, FIT & Rocket Express ovens can be programmed with up to 1024 individual cooking profiles for maximum flexibility.
- **Ventless\*** - integral catalytic converter system reduces the need for expensive extraction hoods, allowing versatile placement. The catalytic converter in a Prática oven can be removed for easy maintenance.
- **Dual temperature operation** - allows the ovens can be programmed to operate at two different temperatures allowing operators to use the ovens in 'more conventional' way as well as for rapid cooking
- **13amp option** - the Prática Copa and Prática FIT models are available in a lower power, single magnetron 13amp configuration.

\* Contact us for exact details of Rapid Cook Ovens ventless capabilities

\*\* Profit example based on one product, the ovens can cook many items in higher volumes, your profit potential will vary. Example doesn't take into account labour or electrical costs.

**TEFLON COOKING TRAYS**

**RAPID COOK CLEANERS**

# CLAMSHELL GRILLS & GRIDDLES

## Grill smarter, not harder!

The Taylor grill line focuses on efficiency, safety and productivity. The press of a button cooks healthy seafood, beef, veggie or chicken burgers, grilled sandwiches and much more. Revolutionary two-sided grilling can cook a frozen patty two-thirds faster than traditional grills. Programmable cook times and pre-set temperatures allow you to cook a varied menu each day.

### Clamshell cooking variables

**Time** - the amount of time required to cook the product to safe temperatures.

**Temperature** - independent temperature settings of the lower plate and upper platen.

**Gap (thickness)** - the amount of compression the upper platen exerts on the product.

### Features of clamshell grills include

#### Easier

- Totally automatic, takes the guess work out of cooking and reduces labour requirements
- External USB port allows for easy menu uploading
- Easy-to-access external side grease traps allows for easy removal and cleaning

#### Faster

- Cooks both sides of the product simultaneously
- Cooks products up to 66% faster than traditional flat grills
- Increased cooking speeds eliminate holding products and reduce product waste

#### Smarter

- Intuitive, programmable controls take guess work out of cooking
- Up to 72 menu items per cooking zone
- Self diagnostics to easily identify faults reducing down time
- Precise automatic gapping for consistent, great results

#### Safer

- Evenly cooks by providing consistent temperatures across the entire cook surface
- Automatically applies the exact pressure to the product for consistent cooking
- Platens will automatically open at loss of power or if an obstruction is detected

### Profit example: 1/4lb Cheese Burger

# COMMERCIAL OVENS

## Combination Cooking

Eloma commercial ovens' ethos is based on a balanced blend of traditional techniques and modern processes – from the development of the first combi steamer to the latest JOKER generation. Eloma remains true to this philosophy so that you can continue to experience the joy of cooking and baking in to the future. Tradition is “100 per cent made in Germany” and modern aspects include technology with little environmental impact, versatility and simple operation which is fun and easy to understand.

### JOKER - The Right Fit!

Are you ready for the revolution? Joker is the first fully configurable compact class of commercial combination ovens. More flexible than ever. More space efficient than the others. More stylish than any other. And as individual as you need it to be!

- **Position of controls** - you choose where you want the control panel; left side, right side or on top. The door can be hinged to suit the flow of your kitchen.
- **Capacity** - Joker is available in two tray configurations; 6-23 which takes GN23 trays, or the 6-11 which takes full size GN1/1 trays. Both sizes can take 6 trays (5+1).
- **Control module** - MT versions are fully customisable and programmable making them ideal for operators which prepare food consistently over and over again. ST versions offer a more manual interface, perfect for a la carte kitchens who cook different items 'on-th-fly'.
- **Water module** - Joker ovens can be ordered with full steam capabilities, steam injection for baking, or simply as a convection oven for dry heat cooking.
- **Cleaning module** - the Autoclean® Pro option provides a complete automatic cleaning solution using either liquid or solid cleaners. Manual cleaning with a rinse hose is also available.
- **Condensation hood** - Joker ovens can be fitted with a condensation hood which removes excess steam and moisture from the cooking chamber reducing emissions vented into the working environment.

### BACKMASTER

#### The little professional for great baking results!

Exceptionally even baking results with highest user-friendliness. The new BACKMASTER combines Eloma's baking expertise with the forward-thinking, user-friendly MT-Technology - excellent baking results every time you cook!

- **MT-Technology** - simple and safe operation, especially thanks to the Quick Mode or the Quick Mode with Automatic Steam Control (ASC).
- **Baking with a view** - the large viewing window and the ideal lighting provide insights for the user and stimulates the appetite of the customers.
- **Full control** - prolong the baking program during or after the cycle. No re-entry of the baking parameters is necessary. The automatic door release avoids over baking after the baking program has finished.
- **Automatic Steam Control** - the oven's MT technology can automatically control the moisture levels in the oven, factoring in suitable 'resting' times relative to the humidity to ensure the perfect results are achieved for each product.
- **Programmable** - ovens come with an extensive range of baking programs but specific cooking profiles can be created and stored easily by the operator to ensure consistent results time after time. Manual 'on-the-fly' cooking functions are also featured.
- **Condensation hood** - Joker ovens can be fitted with a condensation hood which removes excess steam and moisture from the cooking chamber.

# COMMERCIAL DEEP FRYING

## Equipment & accessories

### Ventless deep frying technology

Since 1986, Perfect Fry is the leading supplier to the foodservice industry for counter top deep frying solutions. The easy to use multi-functional units are ventless and odourless fryers that can bring high quality food out from under the hood space in kitchens. Perfect Fry currently helps industries like convenience stores, bars and nightclubs, movie theatres, bowling alleys, concession stands, and more bring a better variety of superior dining options without installing overhead ventilation.

### Small footprint

Perfect Fry fryers install on your counter top. The machines take up a counter area 50 cm wide by 60 cm deep. The high-volume output means that foodservice businesses with limited space can now offer a complete fried menu even if they have limited space for equipment.

### Odourless operation

Perfect Fry fryers are designed with its own air filtration system to remove grease particulates from the exhausted air to a degree that is unmatched by competitors. Which means your customers will smell your food and NOT your fryer.

## frifri Electric Deep Fryers

Fri Fri has been manufacturing high quality deep fryers for over 70 years.

Success ultimately depends on the quality and consistency of the food you produce. Fri Fri fryers deliver incredibly accurate and uniform cooking every time.

- **That All Important Crunch!** – the electronic temperature control and powerful heating elements ensure fast recovery between cooks. Precise controls maintain the temperature with 1° C +/- which prevents food absorbing excess oil.
- **Keeping your oil in peak condition!** – Fri Fri fryers feature a number of systems to preserve the cooking oil. FriFri Oil Assistant with on-screen oil status bar provides information on oil age and number of cook cycles. xFri© pumped oil filtration can be used when the oil is hot allowing the operator to keep the oil in perfect condition.
- **Are there more fries than last time?** – Adaptive cooking automatically adjusts the cooking times to suit batch size, this ensures food is not undercooked regardless of the portion size.
- **Deliver big in a small space!** – From a 200mm wide single tank fryer, you can deliver up to 22Kg fries per hour.
- **FriFri - build your perfect fryer!** - Fri Fri fryers are available in single, twin or triple tank configurations, each is individually controlled using a choice of interfaces - Super Easy, Precision or Touch. Each fryer can be built with different power options to suit each installation.
- **Oil filtration options** - Fryers can be fitted with either gravity or pumped oil filtration systems. Each tank can have its own filtration unit to prevent cross-contamination.
- **Auto-Basket Lift** - Precision & Touch fryers can be fitted with an automatic basket lifting system.

Visit [www.taylor-company.co.uk](http://www.taylor-company.co.uk) for more information, download specification sheets and request a FREE consultation with your local Taylor UK sales manager

## Perfect portion control

### Features of RAM food dispensers

Cooking from frozen helps reduce oil degradation from excess moisture. Dispensing directly into the frying basket reduces product handling which promotes good food hygiene.

- **Easy-to-Clean** – the RAM is designed for simple daily cleaning of both the cabinet and refrigeration filter.
- **First-In-First-Out** – the RAM ensures good 'FIFO' maintaining freshness and product quality is maintained at all times.
- **Practical** – provides storage of up to six fryer baskets with flexible store configuration for left or right hand door opening.
- **Dispensing** – push button dispensing system enables the operator to fill one basket, then slide the next basket back into the fill position for rapid filling during busy service times.
- **Accurate portion control** - an electronic weighing system allows for a portion-controlled fill level for the basket. The unit incorporates an inductive sensor to ensure proper basket placement prior to dispensing.

# HOT HOLDING CABINETS

Reduce wastage, increase profits!

Stay hotter and crisper for longer...

The Carter Hoffmann Crisp 'N Hold is designed to keep fried foods crisper and hotter for longer. As a result, customers are served a superior product without adding complication to the kitchen.

## Exclusive heater design

Heater components, isolated in the rear of cabinet, are protected from oil migration. This provides a constant stream of warm air to maintain the ideal serving temperature and extend the holding time of crispy fried foods.

## Preserve quality

Warm air is forced through the bottom food grate and drawn through filter at the rear. This maintains constant air circulation and provides a warm blanket over and throughout the food. This controls moisture accumulation and maintains food crispness. As a result, the Carter Hoffmann Crisp 'N Hold can extend the life of fried food by as much as 4 times when compared to heat lamps.

## Hot & ready to serve

The Deli Hold system keeps menu items at their perfect serving temperature maintaining maximum levels of food hygiene without compromising the quality of the product.

## Features of Deli Hold

The Deli Hold allows operators to safely hot hold multiple products, at their ideal individual temperatures, speeding up serving times and turning orders around quicker.

- **Individual timers** - each draw can be programmed with its own individual timer ensuring maximum quality and food safety regulations are maintained.
- **Precise temperature control** - ensures each menu product is maintained at the highest quality.
- **No heat transfer to the external panels** - allows the Deli Hold to be placed close to other pieces of equipment or even stacked.

# CUSTOMER SERVICE & SUPPORT

Taylor UK are the market leaders in the supply of specialist catering equipment to freeze, whip, steam, grill, cook, blend, serve and display your products to the highest possible standard.

HTG Service is the customer service and support division for HTG Trading Ltd.

## A complete service

Known not only for our extensive range of high quality, profit-generating machines, but for our service and after-care that really makes us stand out from the crowd.

As soon as you contact us, we treat you as a valued customer, which is why we do everything we can to give you all the help and information you need.

## After you have purchased

- Your equipment will be delivered, installed and commissioned for immediate operation
- Our trainers will provide demonstrations for cleaning regimes, hygiene and operating methods
- We can advise on ingredients and menus to maximise your return on investment

## Once installed

- We provide a UK wide, 7 days a week, 364 days a year service facility, using directly employed strategically located fully trained Taylor engineers to ensure you are never left without support
- Any service or parts enquiries are dealt with by our technically trained customer service operators ensuring minimal downtime for your equipment
- Each engineer carries a high level of spare parts stock in their vehicle along with specialised equipment and tools to deliver a high level of 'first-time-fix'
- Ongoing technical service is supplied by our field service management team

## Optional extras

- Extended parts and labour warranties (selected brands)
- Preventative maintenance plans
- Scheduled quarterly replenishment of consumables
- Workshop refurbishment facility to extend your equipment's working life
- Additional training programmes for both new and existing staff

Taylor UK is a division of HTG Trading Ltd (Hubbard Taylor Group).

Hubbard Systems is the exclusive UK distributor of Scotsman ice making equipment and Friulinox refrigeration, and a key water filtration partner with 3M.

Taylor UK are the exclusive distributors of the Taylor, Frigomat, Prática, and Eloma ranges in the UK and preferred suppliers of ISA, Icetec and other selected Middleby Corporation manufactured equipment, bringing you over 45 years of experience in sales, product development, distribution, service and aftercare specific to the UK marketplace.

## Meeting your needs

No matter how large or small your equipment requirements, Taylor UK will provide the machines, and HTG Service will provide the aftercare and ongoing support that's right for you. Currently we have over 10,000 pieces of equipment operating on a daily basis throughout the UK. These are supported by high stock levels of spare parts, held both centrally at our head-office in Suffolk and in the field on our engineer's vans, ensuring that, should you have a problem, we attend your site quickly but most importantly offer the highest level of first-time-fix rates. We provide a UK wide, 7 day a week, 364 days a year service facility using only directly employed, factory trained HTG Service engineers and call centre advisors.

## Investing in people

Through continuous investment in our business, we are proud of our position as market leaders. Our strong investment policy also applies to our staff, whether through training or ensuring that we recruit the right people for the right jobs. We are firm believers in people power which is why we manage to exceed our customers expectations time and time again.

## Always at your service

At HTG Service, it's our service and customer care that really makes the difference – we're more than the market leaders for our products alone. As soon as we make contact with a customer, we endeavor to do everything we can to provide the right kind of help and information. This may require a site visit to your business in order to help you clarify your needs, and to explain the finer details.

## Built to last

All of our equipment is built to exacting standards. Stringent testing and continual upgrading ensure they achieve the perfection our customers expect. The expertise of the HTG Service technical team goes a long way to ensuring your machines will always perform to the highest standards. But it doesn't end there because when your machine reaches your premises our customer training team will be on hand to enable you to get the very best out of your new equipment.
